

Project Update

March 13, 2026

Contract B-26 Hwy 73 Beyers Cove Rd Sanitary Sewer Extension

Beyers Cove Road Sanitary Sewer Extension

Project information: Construction involving sanitary sewer extension, lateral construction, roadway restoration (pavement in May of 2026), and landscape restoration.

Timeline: Construction period - March through April for sanitary sewer construction and landscape restoration then pavement restoration in May.

Road Closures, Vehicles & Traffic: While under construction, the road will be "Closed to Traffic" from Monday morning to Friday afternoon. Travel to properties inside and outside the construction zone will be possible by using the detour route. See the District website (glakesd.com) for that route. This is a short period and closing the road for construction will reduce the closure period and provide safety to the workers.

Resident Access: Local resident access to and from your home in the construction zone will be maintained as much as possible during construction.

Communication: It is the intent of the Sanitary District to minimize the amount of disruption and inconvenience to the residents during any construction process. If during normal work hours you feel something went unnoticed, or needs attention, please contact **Cedar Corporation**. As project inspector, Cedar Corporation is most familiar with the daily operations of construction and can resolve many issues quickly.

If something happens after normal work hours that you feel requires immediate attention, please contact **Lisa Reas**, Administrator, and arrangements will be made to resolve the issue.

As always, in an emergency, please call 911.

Project Updates: Construction updates will be sent out via email by the Sanitary District, on the website and when major changes will be occurring. If at any time you would like additional information, please call Lisa 920-295-4488 or Matt 920-492-0555.

Gas Main Relocation: Reminder that WE Energies has completed the gas main relocation on Beyers Cove Road. Keep in mind, it appears some areas have been damaged during installation and will be restored by them at their cost.

Restoration: The Contractor will complete the restoration in April. The County Highway Department will complete the pavement restoration in May once the asphalt plants open. In the meantime, travel on the gravel road will be acceptable; however, travel at slower speeds until the asphalt is completed.
